

# VISITING REGULATIONS: BIRTH AND CHILDBED

For our expectant mothers and women in childbed the following regulation applies:

- The partner/husband may be present during the birth as well as visit according to regular visiting hours.
- The siblings are allowed to visit the mother and the newborn from the first day. We ask you to limit the visit of the children to a maximum of two hours per day.
- Double room: If the room neighbor agrees, the visit of the siblings may take place in the room. If this is not desired, we ask the family to meet in the gallery on the 2nd floor, as long as no other patients are staying there.
- The partner/husband must leave his or her personal details (including those of the children) on a form in the patient's room and give them to the nursing staff.
- Visitors are required to wear a mask - even in the patient's room. Children from the age of twelve are also obliged to wear a mask, between six and twelve years of age we recommend mouth protection.
- When eating and drinking in the cafeteria, the mask may be removed. A mouth and nose protector is handed out.
- Visitors with symptoms of coronavirus infection are not allowed to visit patients. These include symptoms of an acute respiratory disease (e.g. cough, sore throat, shortness of breath) with or without fever, feverish feeling or muscle pain as well as sudden loss of the sense of smell or taste.
