

## WELCOME

In the last decades, anaesthesiology and intensive care medicine have progressively had to manage the elderly, polymorbid and polymedicated patient undergoing more complex surgical procedures.

Patient-tailored anaesthesiological skills, technical innovation and the application of new, more controllable drugs, have significantly reduced mortality and morbidity directly induced by anaesthesia.

Our specialties and competences are increasingly targeted towards the optimal prevention and management of diverse perioperative risks. The 2018 edition of the Hirslanden Anesthesia Symposium focuses on this evolution. A broad panel of Swiss and foreign speakers will treat the topics of "Chronization of acute pain" on Friday 8<sup>th</sup> June and "Perioperative risks: an update" on Saturday 9<sup>th</sup> June 2018.

We would be very pleased to meet you in June on the shores of Lake Geneva in Lausanne for the Hirslanden Anesthesia Symposium 2018.

Best regards,

PD Dr. Werner Baulig

Dr. René-Andreas Marti
