

## Clinical-surgical range

### Esthetic and Reconstructive Surgery

- Rhinoplasties (functional, esthetic, primary, secondary rhinoseptoplasties)
- Nose reconstructions (after tumors, accidents, malformations)
- Eyelid surgery (esthetic, functional in case of restriction of the visual field, lacrimal sacs, reconstructions after tumors and accidents)
- Eyebrow lift/forehead lift (directly/indirectly, open/endoscopically)
- Face lift/neck lift (MACS-Lift, High-SMAS-Lift)
- Midface lift (Arcus marginalis release, fat redistribution)
- Correction of ear deformities (ear set-back plasties for children and adults, reconstruction after tumors and accidents)
- Face reconstructions (after tumors, accidents with local and free flap plasties)
- Autologous fat transfer/lipofilling (esthetically, volume compensation, scars, "Microfat", "Nanofat")
- Endocrine orbitopathy (Orbital decompression surgery in case of Exophthalmos in case of M. Basedow, "googly eyes")

### Esthetic and Reconstructive Breast Surgery

- Breast enlargement (with implants and/or autologous fat transfer, "BRAVA")
- Breast reduction (inverse T-incision, scar-saving with vertical technique)
- Breast reconstruction (after tumors and accidents with autologous tissue (DIEP, TRAM, msTRAM, TMG, SGAP, Latissimus dorsi), autologous fat transfer ("BRAVA") or implants)
- Breast lifting (scar-saving technique, in combination with autologous fat and/or implants)
- Breast malformation (breast asymmetry, tuberous breast malformation, Poland-Syndrome)
- Nipple reconstruction (after tumors and accidents with local flap transfer, tattoo)
- Nipple revision (inverted nipples)
- Secondary optimizing breast surgery („SOS-surgery“ in case of capsule fibrosis or complications after external previous surgery)

### Treatment with autologous fat

- Breast enlargement (BRAVA; Macrofat)
- Compensation of breast asymmetries (Macrofat)
- Breast reconstruction or refinement after a breast reconstruction (Macrofat)
- Volume treatment of the face (Microfat)
- Volume treatment of the hands (Microfat)
- Skin rejuvenation of the face (Nanofat)
- Skin rejuvenation of the hands (Microfat/Nanofat)
- Improvement of the quality of scars throughout the whole body (Nanofat/Microfat, SNIF-Method)
- Gluteal augmentation (buttock enlargement/buttock lift; Macrofat)

### Body contouring and postbariatric surgery

- Abdominal reduction (Abdominoplasty, Mini-Abdominoplasty)
- Circular abdominal / back lift (Belt lipectomy, dermolipectomy)
- Thigh lift (inguinal incision, longitudinal incision)
- Upper arm lift
- Lift of the upper back and lateral thoracic wall (thorax lift)
- Gluteal lift (buttock lift, contouring)
- Fat removal (liposuction)

### Non-invasive esthetic surgery

- Botox treatments
- Filler treatments
- PRP treatments (autologous blood, "vampire lift")

Microsurgery

- Free flap plasties (after tumors and accidents in the facial or the neck area, at the breast or limbs)
- Surgery of the lymph (supra-microsurgery in case of vascularized lymph node transfer, lymphovenous anastomoses)
- Pedicle perforator flap plasties (after tumors and accidents)
