

PATIENT SAFETY

PATIENT IDENTIFICATION BRACELET

YOUR SAFETY DURING YOUR STAY IN OUR HOSPITAL IS OUR TOP PRIORITY. THAT IS WHY WE RELY ON PATIENTS WEARING A PATIENT IDENTIFICATION BRACELET.

PURPOSE

Upon entering the hospital, you will receive a patient identification bracelet from us for your safety. Please wear your personal identification bracelet during your entire stay with us. It is essential to verify the identity of the patient throughout the course of treatment. The patient identification bracelet is used to check your identity over and over again during all stages of treatment (e.g. laboratory and X-ray examinations, administering medication, operations).

The bracelet is made of a robust plastic composite material so that you can move around and wash without restrictions. If it has to be removed during your stay, you will receive a replacement immediately. After your discharge, the bracelet will be disposed of in accordance with data protection regulations.

VOLUNTARY

You can reject the patient identification bracelet. In this case, we kindly ask you to sign a waiver. We do however strongly recommend wearing the patient identification bracelet.

Many thanks.
